PROFESSIONAL SUMMARY

Co-Founder at SwapEat (swapeat.in) and Computer Science scholar at Lovely Professional University. Experienced in campus dining operations, cafeteria vendor partnerships, meal distribution logistics, and scalable software development across C++, Python, SQL, JavaScript, React, Node.js, and MongoDB. Proven track record in streamlining vendor supply chains and automating data analytics pipelines.

EXPERIENCE & ENTREPRENEURSHIP

SwapEat — Co-Founder (Core & Operations)

`Current / Ongoing · swapeat.in`

- Actively driving campus business operations, cafeteria vendor onboarding, and partnerships across university food hubs.
- Streamlining student meal exchange logistics, order turnover workflows, and on-ground campus operational execution.
- Leading vendor relationship management and campus food-tech business development deployed live at swapeat.in.

Building Mannier′ — Data Analyst (Internship)

`Jul 2025 – Nov 2025 · India`

- Managed multi-dimensional datasets, designed queries, and extracted required analytical outputs for business stakeholders.
- Collected, cleaned, and analyzed datasets to identify operational patterns and actionable business intelligence.
- Assisted in preparing data-driven recommendations and automated repetitive reporting workflows using SQL and advanced Excel formulas.

VERIFIED INDUSTRY CERTIFICATIONS

Oracle Data Platform 2025 Certified Foundations Associate
Oracle · May 2026

Validated competency across Oracle data platform ecosystems, data lakehouse architectures, schema modeling, and enterprise data workflows.

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate
Oracle · May 2026

Demonstrated verified understanding of core AI, Machine Learning, Deep Learning, Generative AI models, and OCI AI infrastructure services.

Data & Data, Everywhere
Google Career Certificate · Jan 2025

Comprehensive coursework covering data analytics ecosystems, data cleaning methodologies, spreadsheet analytics, and structured data validation.

Basics of OS
Cisco Networking Academy · Aug 2024

Foundational engineering in operating system architectures, process management, memory hierarchies, and system security primitives.

KEY PROJECTS

Uni Sphere — University Social Networking Platform · GitHub ↗
Apr 2026

Conceived and developed a university-exclusive social networking platform connecting verified students within dedicated campus environments. Engineered features for student networking, academic peer collaboration, campus event discovery, and student club engagement. Built with React JS, Node JS, MongoDB, and JavaScript.

Focus — Daily Habit & Performance Telemetry Dashboard · GitHub ↗
Jan 2026

Designed and engineered an interactive performance tracking dashboard to analyze daily habits, consistency metrics, and development goals. Cleaned and structured routine datasets for accurate trend visualization and automated analytics reporting using HTML5, CSS3, and JavaScript.

Enterprise Data Pipeline & Task Automation · GitHub ↗
Nov 2025

Engineered automated data ingestion and aggregation workflows for relational enterprise schemas. Implemented data transformation scripts in Python and complex analytical queries in SQL to eliminate manual reporting friction.

TECHNICAL & CORE SKILLS

Programming Languages: C++, JavaScript (ES6+), Python, SQL, HTML5, Modern CSS3

Technologies & Frameworks: React JS, Node JS, MongoDB, Git, GitHub, RESTful APIs, Ms Office

Technical Competencies: Data Structures and Algorithms, Responsive Web Design, Data Cleaning, Automation Scripting

Operations & Leadership: Cafeteria Vendor Onboarding, Campus Meal Logistics, Business Strategy, Critical Thinking, Collaborative Leadership

EDUCATION

Lovely Professional University (LPU), Punjab — Computer Science
2024 – 2027 · Phagwara, Punjab

Mar Baselios Vidya Bhavan — 12th Standard (Science Stream) · 61.60%
2023 – 2024 · Bhilai, Chhattisgarh

MGM Public School — 10th Standard (Science & Mathematics) · 75.00%
2021 – 2022 · Bhilai, Chhattisgarh
